

Your patient, Luisa Munoz, was admitted to Concordia Transitional Care and Rehabilitation on 1/26/2018. A customized rehabilitation program was implemented to address functional deficits related to the diagnosis of Calculus of Gallbladder.

After successfully completing the therapy program at Concordia Transitional Care and Rehabilitation, Luisa Munoz was discharged to home.

The patient's rehabilitation treatment program consisted of the following skilled interventions:

OCCUPATIONAL THERAPY: 6x/week x 3 weeks
PHYSICAL THERAPY: 6x/week x 3 weeks
SPEECH THERAPY: 0x/week x 0 weeks

MODEL 10 COMPOSITE SCORE OVERVIEW

Patient achieved 100% of their optimal level of functional independence.

MODEL 10 FUNCTIONAL OUTCOME SUMMARY

Functional Area	Admission Level	OLFI*	Discharged Level	Percent of OLFI
ADLs	6.3	10	10	100%
Balance	6	10	10	100%
Functional Mobility	6	10	10	100%

(0 Dependent/10 Independent)

*OLFI-Optimal Level of Functional Independence

Discharge Status:

Luisa Munoz was discharged from Concordia Transitional Care and Rehabilitation on 2/9/2018.

Additional Notes:

Ms. Munoz was planning on being at our Facility less than one month which she was able to achieve. Treatment was provided 6 days per week with excellent participation and motivation to reach Independence.

" I enjoyed myself here, I had fun doing the Therapy and the activities"

" Thank you to everyone who helped me while I was here" ... Luisa Munoz

It was a pleasure serving your patient's rehabilitation needs. If you have any further questions please contact at concordiamv@reliant-rehab.com.
